Article no: 15280-88

Function and Applications

Supplementary equipment set for the sets Optics 1 (25276-88 or 15278-88) and Optics 2 (25277-88). Together with the sets Optics 1 and 2, the optional equipment TESS Optics color mixing (13250-77) and the optional accessories for Optics 3 (13465-88), it is possible to perform 96 student experiments in total:

- Interference (4 Experiments)
- Diffraction from unidimensional objects (8 Experiments)
- Diffraction from two-dimensional objects (3 Experiments)
- Resolving power (3 Experiments)
- Qualitative experiments on polarisation (6 Experiments)
- Quantitative experiments on polarisation (2 Experiments)
- Propagation of light (11 Experiments)
- Mirrors (11 Experiments)
- Refraction (10 Experiments)
- Lenses (14 Experiments)
- Colours (6 Experiments)
- The human eye (5 Experiments)
- Optical equipment (9 Experiments)
- Wave optics (4 Experiments)

Benefits

- Complete equipment set: simple execution of the experiments
- The equipment is stored in a rugged, stackable and compact box, allowing quick control of completeness (foam insert)
- Experimenting literature for pupils and teachers available: minimal preparation time
- Matched with international curriculum: all topics are covered
- Through the use of a stable optical bench made of metal safe and exact experimental setups
- Simple teaching and efficient learning thanks to the digital experiment descriptions included as a QR code

Equipment and technical data

- The equipment set consists of all necessary components for the experiments
- Robust, stackable storage box with a foam insert fitting to the contained equipment
